

Khachik Grigoryan

Full Stack Developer

Full stack developer with 6+ years building production web apps on Vue 3 / Nuxt / TypeScript and Laravel / Firebase. Shipped a RevOps SaaS platform, an iGaming payment gateway and multilingual e-commerce. I work AI-first: Claude Code, MCP and plan-driven specs are part of every build, cutting delivery time without lowering code quality.

WORK EXPERIENCE

Full Stack Developer

RevyOps — B2B RevOps web platform (via Upwork)

10/2025 – Present · Remote, US team

Lead frontend engineer for a SaaS platform that helps sales teams manage contacts, run outreach campaigns and automate their pipeline. Own features from design to release.

- Built the analytics and reporting module from scratch: interactive charts, drill-down views, saved filters and high-performance data grids over large datasets (Vue 3, Nuxt, TypeScript, ECharts, BigQuery).
- Delivered major product areas: contact and company management, email and LinkedIn campaign tracking, lead scoring, a visual workflow automation builder and third-party integrations.
- Designed the frontend architecture: Pinia state management, a reusable in-house UI component library and a consistent design system.
- Set up end-to-end testing (Playwright, property-based tests) and fixed performance and data-consistency bugs across the app.

Full Stack Developer

Golden SB Tech Group — iGaming

04/2024 – 09/2026 · Yerevan, full-time

- Built a payment gateway for iGaming operators: public API, Stripe Connect transfer flows, staging and production environments.
- Ran a security review of the public API and its documentation.
- Wrote a Stripe-style "How Payments Work" help center with animated SVG flow diagrams.
- Stack: Laravel, Vue 3, MySQL, Docker.

Freelance Full Stack Developer

Direct clients

2024 – Present · Armenia, part-time

- Song: Kanban-style scooter repair workflow system — Laravel 11 + Nuxt 3, role-based access, ticket state machine, multilingual, dashboard filters and payment tracking.
- kugoo.am: full redesign and clean re-architecture of an e-scooter shop (AM/EN/RU) with a new content admin panel.

Full Stack Developer

Remi Soft LLC

05/2021 – 04/2024 · Yerevan

- Built a Vue.js single-page app for student examinations.
- Built a Laravel + Vue.js platform for notary contracts; maintained and extended existing client sites.

Earlier

- Junior Web Developer, CodeRiders — 02/2021 – 05/2021 (PHP, Laravel).
- Intern, National Instruments — 04/2018 – 07/2018 (LabVIEW; car security system presented at DigiTec 2018).

AI-ASSISTED ENGINEERING

- **Claude Code daily:** every project carries CLAUDE.md, DESIGN.md and a plan/ directory of task files, so AI sessions follow the codebase's conventions.
- **Reusable prompt library:** audit, refactor and improvement-track prompts that turn a long review into a repeatable session.
- **MCP servers and plugins:** connect AI tooling to project data; manual control of git commits, every change reviewed.
- **Design-to-code:** prototype in Claude Design / Figma, then build the responsive implementation from the approved prototype.
- **Obsidian knowledge base:** per-project vaults for specs, decisions and architecture notes that feed AI context.

EDUCATION

Bachelor of Radiophysics and Electronics

Yerevan State University

09/2014 – 07/2018 · Thesis: Simultaneous Wireless Information and Power Transfer

Web Development

Level Up IT Center

08/2020 – 01/2021
